Portfolio: junior-dev.pages.dev

Profile

I am a motivated software development student specializing in AI and backend development. My internship at Virtual Dawn has strengthened my skills in FastAPI, WebSockets, service-based architecture, PostgreSQL, large language model integration, and RAG pipelines. I approach work analytically and proactively, and my MMORPG leadership experience has enhanced my communication and organizational abilities.

Projects

Portfolio Website – Personal Project [HTML/CSS | JavaScript | Vanta.js]

A modern, responsive portfolio with a dark theme, interactive background effects, and smooth animations. Developed with the support of generative AI tools, demonstrating interest in modern web development practices.

Larpmaster – Rajakatsefantasia.Ry [.Net/C#]

Modernized an old Amiga-based character creation tool into a Windows Forms application. Responsible for programming, UI design, and data structures, enabling players to create and save characters for live-action role-playing games.

Excuse Generator – School Project [HTML/CSS/JS, REST API, AI]

An AI-powered web application that generates creative and humorous excuses. Built using modern web technologies with a clear and user-friendly interface.

Skills

Backend: Python, FastAPI, REST, WebSockets

Frontend: HTML, CSS, JavaScript

Databases: PostgreSQL, SQLite, SQL

AI & Data: RAG-models, Azure AI Foundry, LLM-integrations

Architectures: Service-based architecture

Tools: Linux, Git/GitHub, Visual Studio, VS Code

Education

Sasky Tampere Vocational College – Software Developer 08.01.24 – 19.12.2025

Work Experience

AI Developer | Virtual Dawn | 06/02/2025 – 19/12/2025

Warehouse Operative | Wippiiwork: PostNord | 15/10/2021 – 03/09/2022

Warehouse Operative | Transval Personnel Services: F9 Distribution | 21/06/2021 – 15/10/2021

Warehouse Operative | Citywork Oy: DHL Express | 20/09/2018 – 08/07/2020
